

Pennant/Banner Instructions

Print as many copies as you need! Print at home or with the print company or photo processor of your choice onto regular 8 ½ x 11 inch paper or cardstock. Best print quality will come from a color laser printer. Use scissors or a paper cutter to cut out each flag pennant. You can connect the flags in various ways, but here are a few ideas to get you started:

1. Punch a hole in each corner of the widest part of the flag, then thread a string or ribbon through the holes;
2. Using an Xacto knife, cut slits in each corner of the widest part of the flag, then thread a string or ribbon through the slits;
3. Punch a hole in each corner of the widest part of the flag, then overlap the holes of the next letter, and attach using a brad that you can find at your local scrapbooking store. Be sure the brad is slightly larger than the hole you have punched; or
4. Using your hot glue gun, place a line of glue along the upper edge of the widest part of the flag, then immediately glue to the ribbon, continue this until you have glued each flag to the ribbon. Use a wide enough ribbon so that glue doesn't seep out the edges.

Thank you for your purchase!
